

Zzzzz

Does interactive classroom technology send you to sleep? Not anymore!

Exciting, innovative Interactive Classroom Technology from Sahara - CleverLCD Touch

Sahara's CleverLCD Touch is beginning to revolutionise the classroom whiteboard market. The CleverLCD Touch resolves all the issues and frustrations that both teachers and pupils have found with a traditional interactive whiteboard in class. Imagine no bright light concerns, no body shadow to contend with, no downtime with failed projectors (and no expensive lamp to replace either!) no darkened rooms, no projector maintenance.

Why integrated?

This is what really differentiates the CleverLCD Touch from overlay screens which have been around for a while. The integrated technology offers precision control, just like a traditional interactive board, with the simplicity of finger activation. You have to try it to see the difference, and experience how easy it is for both teachers and pupils to use.

Classroom tough

The CleverLCD Touch is purpose built for the tough classroom environment, with specially reinforced glass and smooth metal bezel. Its long back light life (over 20 years) ensures that the bright display will look as good in the years to come as it does on the day it is installed, with no image degradation so often found on projectors after 2-3 years use in school.

Classroom ready

The bright display offers the latest in high resolution: HD ready display; 16:9 format ratio, perfect for modern day laptops. The screen can be mounted at any height, with no worries of protruding ceiling or wall mounts. The choice of 4 screen sizes, 32", 42", 52" and 65" means that there is a size to suit most classrooms.

Eco friendly

The auto standby mode ensures that no power is wasted when the screen is unattended. Just disconnect the VGA cable from the CleverLCD and the screen automatically goes into standby after a few seconds. Once reconnected, the screen wakes up in an equally fast time. There is no maintenance required for the screen, easing pressure on busy teachers and technicians.

Price friendly

Prices are falling quarter on quarter, and when compared to a traditional whiteboard solution over time, the investment in tomorrow's technology really does pay for itself. Contact us today for more information or to arrange an on-site presentation.
