

SECURESAFE STATIC

10 compartment laptop charging cabinet

SECURESAFE STATIC 10

Pound Coin Return Lock

Power Point for Laptop Charger

Single Cable Power Supply

The **SECURESAFE STATIC** high security cabinet forms an effective solution for securing all leading makes of laptop computers. Securely bolted down this cabinet is ideal for use in Education and Exhibition Centres, where many laptop users require a temporary safe storage solution, but no manned services are available.

The well ventilated cabinet is easily operated by any user and incorporates a pound return lock (non powered to ensure failsafe operation). A master key is also provided to cater for any lost keys. To achieve a seamless look cabinets can be bolted together.

The **SECURESAFE STATIC** system is truly adaptable and is provided with a charging facility for each compartment (the laptops own charger is required to ensure a safe charge with the correct voltage). Only one power point is required to power the complete storage safe. All pre-installed power supplies are fully PAT tested.
