500mm travel (shown at full height)
Majority of the weight taken by the floor

EASY-TO-INSTALL

Hi-Lo 750 Plasma Wall Mount 750mm travel (shown at half height) All weight taken by floor

AV Technology

Hi-Lo Plasma lifts are designed to give access to the interactive features of the plasma screen, irrespective of the users height. Therefore, tall teachers and short teachers, infants and seniors, the able-bodied and disabled all have equal access to the full features.

All Hi-Lo lifts are electronically driven to give smooth, effortless and accurate adjustment. The various styles adjust vertically between 500mm and 720mm dependant on model. Trolley versions and wall mount models are designed to cope with freestanding situations and where a substantial wall may or may not be available.

An additional benefit of plasma technology is that there is no projector glare or shadow which is especially important in special needs situations.

Speaker Shelf

Laptop Shelf for trolley or wall fixing
