- 1.3 Megapixel Digital Camera
- Bluetooth, USB, Mini-SD Slot, Infrared, High speed wireless networking (802.11 b/g)
- Compact Design
- Robust, IP Rated impact-resistant body with recessed screen
- Microsoft® Windows Mobile 5.0 Premium Edition
- Built-in GPS
- Optional Software bundle
- Optional warranty and insurance packages
- Optional GSM/ GPRS phone & HSDPA

Hand Held Learning

Designed for the classroom Indoors & Out, combining functional performance with a robust casing, being lightweight and compact, it can easily be carried in school bags and used in the classroom and outdoors with confidence.

PDA features a bright 3.5-inch display, which is clear and easy to read with a Q-VGA (240 x 320 pixels) resolution. Outstanding connectivity is provided through Bluetooth, IrDA and Wireless LAN. Data is protected against accident loss by the persistent memory feature of Windows Mobile 5 Premium Edition.

Advanced Features for increased learning opportunities

PDA is equipped as standard with GPS and is immediately compatible with software applications such as WildKey, Memory Map, Mscape, etc.

Quad band GSM/ GPRS & HSDPA 3G functionality is available as an extra-cost option to provide any-time, any-where Internet access. Data packages also available.

EDUCATION SOFTWARE SOLUTIONS FOR HANDHELD LEARNING

SUMS Online is the leading maths software in handheld trials across the UK.

SUMS Online software is a whole school resource that will help your pupils to learn to love maths, and provide you with a valuable lesson resource. In lessons you can use SUMS Online games and activities on your electronic whiteboard and in the computer suite, using the CD based version of our software. Outside of the lessons your pupils access it from home over the internet. You can even use it over the internet from school.

SynchronEyes classroom management software connects a teacher's computer with every PDA in a networked classroom. **SynchronEyes** software is easy to use and offers a variety of features that enable you to keep students focused on learning and redirect their attention if they go off track. You can communicate, monitor or collaborate with students individually or as a group, so everyone gets the most out of class time.

RedHalo is the next generation managed learning platform for mobile devices supporting all the content creation and distribution needs of a mobile learning environment.

As more students use mobile devices for their learning it is vital that their work is not lost or destroyed. However most mobile devices have limited storage capability and the removable storage that does exist is easily mislaid. Online storage is an inexpensive way to securely and safely store this work either simply as a back-up vault or as an organised portfolio of digital work. Searchable, interoperable and easily retrieved from almost anywhere on a variety of devices

Encourages inclusion of all pupils in every lesson.

Old-fashioned informal assessment as a "show of hands" isn't practical for measuring all pupils at the same time, because manual counting becomes more difficult as group sizes grow and pupils have a tendency to copy each other, especially if a sensitive subject is being discussed. Because of TurningPoint's handheld response approach there is "nowhere to hide" so teachers can gain comprehensive, specific, tangible information about what pupils know.

vPad - TurningPoint's unique vPad software can be used on hand held learning devices so no specialist response devices are necessary.

Office 2006 for Pocket PC's is the mobile solution to the familiar office applications we just can't live without.

An office suite on your Pocket PC that works just like Microsoft Office on your desktop computer! Most importantly, **TextMaker** and **PlanMaker** read and write seamlessly to all Microsoft Word and Excel files
